CARE INTERNATIONAL

CARE is well known for its famous CARE package. Millions of such packages brought food and other essential to World War II survivors. Others know CARE for providing food aid, emergency relief, health care, roads and other assistance to poor families in the developing world. Over time, the CARE package has become a symbol of hope and CARE a way to reach out and help.

But CARE has transcended these roles. CARE today is about achieving lasting victories over poverty and building a better world for all. We seek to confront underlying causes of poverty rather than merely treating symptoms. We work with families and communities to implement the solutions needed to overcome the greatest threats to their survival and help them realize their rights and potential. By providing information, education or capital infusion – things not included in the original CARE Packages – CARE is transforming lives. CARE seeks to tap human potential, to leverage the power of people and, in doing so, unleash a vast force for progress. While CARE's spirit remains the same – to reach out, help and bring hope- our sights have been raised, our mission strengthened and our passion emboldened.

As we wage this campaign to vanquish poverty, our battlefields are barnyards and fields of poor farmers, classrooms and playgrounds of young children, and homes and businesses of women struggling to make ends meet. Our watchwords are empowerment, equity, sustainability and social justice. While our goal is ambitious, it is achievable. And progress already is being made.

CARE around the world

- A federation of 12 national associations (Australia, Austria, Canada, Denmark, France, Germany, Great Britain, Japan, Netherlands, Norway, Thailand, and the USA) working in over 70 countries
- 90 % of the annual budget is devoted to putting projects into practice
- 700 projects in Africa, Latin America, Asia, and Central Europe
- 45 million people benefit from these projects every year

One objective: to fight poverty.

In over 70 countries the CARE network is building, transforming, and giving a sense of responsibility and independence to those most in need, while protecting their economic and social rights. Fighting discrimination in all its forms, the organization deals in sustainable development and each project is put together with a view to sustainability and substantial change.

CARE in France

- More than 40 projects carried out in more than 22 countries throughout 4 continents (Romania, Togo, Benin, Chad, Cuba, Laos, Vietnam...)
- Actions in a wide range of areas: micro credit, water and sewage, the struggle against AIDS, education, food hygiene, the environment, emergency aid and rehabilitation, child protection.
- A global vision of development, with the goal of contributing to the autonomy of populations so that they eventually have the means to take care of themselves.
